The Revolution Continues! Water Wolf UW2.0

The Water Wolf cameras have sparked a revolution in understanding how fish behave and react to the bait and lures we present them with. Now, the Water Wolf cameras are better than ever – with a series of improvements that make the Water Wolf camera even more versatile.

Waterproof down to 100 meter, which means it can be used for extreme deep-sea fishing. More shock resistant. Fitted with a 100% battery charge mark indicator. Adorned in a CamoTech Green Housing-colour. Use for trolling, casting, float or carp fishing. Uniquely designed and engineered in Denmark. Super Anti-wobbling retrieve and up to 3.5 hours recording.

Pack Size: 1

Whether it's predator fish, monster carp, or even saltwater species, with a waterproof rating of up to 100m, the Water Wolf can help you record great footage at a wide range of fishing depths.

Never miss a jaw-dropping moment thanks to the long-lasting battery – achieve up to three-and-a-half hours of recording time on a single charge.

The nature of underwater video footage often means poor lighting conditions. That's not a problem for Water Wolf with its Low Lux technology, which offers exceptional performance in the dimmest conditions.

Footage always comes out looking great with natural and accurate colours thanks to built-in auto white balance (AWB). It also makes recording easier as there are less settings to adjust – just turn it on, cast it out, and go.

Every bite, every follow, every fish that comes into your swim – you can see it all in crisp, sharp detail thanks to the high-definition 1080p footage the camera generates.

The Water Wolf is compatible with Micro SD Cards in sizes from 2GB through to 12GB. Footage recorded onto the Micro SD Card is compatible with both Windows PCs and Macs.

Make sure you are always ready to grab great footage on the go thanks to the high-speed USB 2.0 charging port. Quickly and easily charge the camera from any USB power source.

A super wide angle lens means you won't miss a single second of the action – get everything that happens around your bait or lure on camera. No more surprises.

Capture the true beauty of the fish you covet with high-quality, full colour footage that looks great even in low light conditions.

It's not only epic images that the Water Wolf captures, but also dramatic sound thanks to a built-in microphone to help make your video clips into a masterpiece.
